

Fact sheet 4

# Taxi features to assist those with disabilities

All licensed taxis:

- Are accessible for wheelchairs
- Have level floors
- Have large grab handles

Most current production taxis are also being fitted with:

- Sight patches for those with impaired vision
- Swivel seats to assist those with mobility difficulties
- Intermediate steps to assist those with mobility difficulties
- An induction loop system to assist those with hearing difficulties
- An intercom to assist the hard of hearing

The current production TX1/TX2 also Has a child seat built into the centre rear arm rest.
